PROFILE

UNSW Master of Information Technology student with professional experience in fast-paced technology environments, bringing strong communication, organisation, problem-solving and collaboration skills. Experienced working with diverse teams, supporting user-focused products, coordinating activities and adapting quickly to new environments and responsibilities. Currently based in Sydney, with a strong interest in customer-facing, community, events and operational roles where reliability, initiative and positive interactions matter.

AVAILABILITY

Monday – Sunday : Flexible availability, including weekends.

EDUCATION

University of New South Wales (UNSW Sydney) <i>Master of Information Technology</i>	Sept 2026 – Present
Visvesvaraya Technological University <i>BE in Computer Science and Engineering</i>	Jan 2021 - June 2024 CGPA: 8.9/10.0

EXPERIENCE

Convin.ai <i>SDE-1</i>	Aug 2024 - Feb 2026
- Worked in a fast-paced product environment, collaborating with engineering and product teams to improve user-facing conversational AI experiences and resolve technical issues. - Supported production systems handling over 1M+ daily activity records, contributing to reliable data tracking and responsive reporting for product users. - Investigated performance and data-processing challenges, reducing reporting memory usage by 93% through improved processing workflows and efficient data handling.	
Greendzine Technologies <i>Product Developer Intern</i>	May 2024 - July 2024
- Worked on a user-facing electric vehicle application, identifying and resolving reliability issues to improve consistency of the overall user experience. - Introduced hands-free voice interaction for vehicle operations, helping make the application more accessible and convenient for users. - Contributed to migrating web functionality into a mobile application, supporting broader accessibility and a 25% increase in adoption.	
Zintlr <i>Software Development Engineer Intern</i>	Jan 2023 - Mar 2023
- Collaborated with a development team to build a language-learning chat application focused on creating a smooth and engaging user experience. - Improved the responsiveness of chat interactions, reducing response time by 50% and contributing to a more seamless user experience. - Worked with new technologies and APIs to introduce text-to-image functionality, adapting quickly to changing product requirements.	

VOLUNTEERING

Arc @ UNSW <i>General Volunteer</i>	Sept 2026 – Present
Check Point: Support student wellbeing activations by engaging with students, assisting with event setup and delivery, and helping create welcoming and inclusive spaces. Arc Insiders: Engage directly with students through campus activities, understanding their interests and connecting them with relevant events, activities and support programs.	

- **Arc Goes To...:** Contribute to planning and delivering student trips and experiences across Sydney, coordinating logistics, participant needs and activities with fellow volunteers.

Abhikalpana NGO, India | *Volunteer*

Sept 2021 – May 2024

- Supported medical camp operations for underprivileged children by coordinating arrivals, guiding children to appropriate areas and organising seating and waiting arrangements.
- Taught academic subjects and organised educational, creative and recreational activities for children, adapting activities to encourage participation and teamwork.
- Assisted with maintaining children's medical-history and examination records during the camp.

SKILLS

Communication & Customer Engagement: Verbal communication, active listening, student engagement, relationship building, working with diverse groups

Organisation & Coordination: Event support, activity coordination, logistics, time management, attention to detail

Digital & AI Literacy: AI tools, Generative AI, digital platforms, online collaboration tools, technology adoption

Data & Problem Solving: Data-informed decision making, troubleshooting, analytical thinking, process improvement

Teamwork & Adaptability: Cross-functional collaboration, learning new systems, handling changing requirements, working in fast-paced environments
